

Empowering every person to live longer, healthier lives on their terms

Enable Choice & Control for People

Deliver Multi Agency Collaboration

Improve Strategic and Operational Insights

Share Information Safely

Reimagine Health & Social Care

Engage people and their carers with tools and information to make choices about their health and care priorities, and to take ownership for their health and wellbeing.

Support health and care coordination through improving inter agency collaboration and information sharing – work as one system.

Connecting data from across systems, creating insights to predict risk and help improve health and care for individuals & population, support better commissioning & service planning

Protect sensitive data to support privacy and effective security end-to-end. Manage consent to share data.

Improve equity of access to services. Supply all with next generation innovation in both health and care.
