

A person is looking at a tablet computer. The screen shows a data visualization interface with a map and various charts. The background is blurred, showing a person's face and a blue chair.

National Data Strategy

UKAuthority- Data4Good

A person is seen from the side, wearing a dark green long-sleeved shirt, using a laptop. The laptop screen is visible and shows a blurred interface with green and orange elements. The background is out of focus, showing a wooden desk and a white wall. The text "What we'll be doing today" is overlaid in white, bold, sans-serif font on the left side of the image.

**What we'll be doing
today**

- Some context
- Introducing the National Data Strategy
- Discussion - your hopes for the National Data Strategy

A person is seen from the side, wearing a dark green long-sleeved shirt, looking at a laptop. The laptop screen is out of focus, showing some green and orange colors. The text 'The government data landscape' is overlaid in white, bold, sans-serif font across the center of the image.

The government data landscape

‘Getting data right is the next stage of public sector reform’

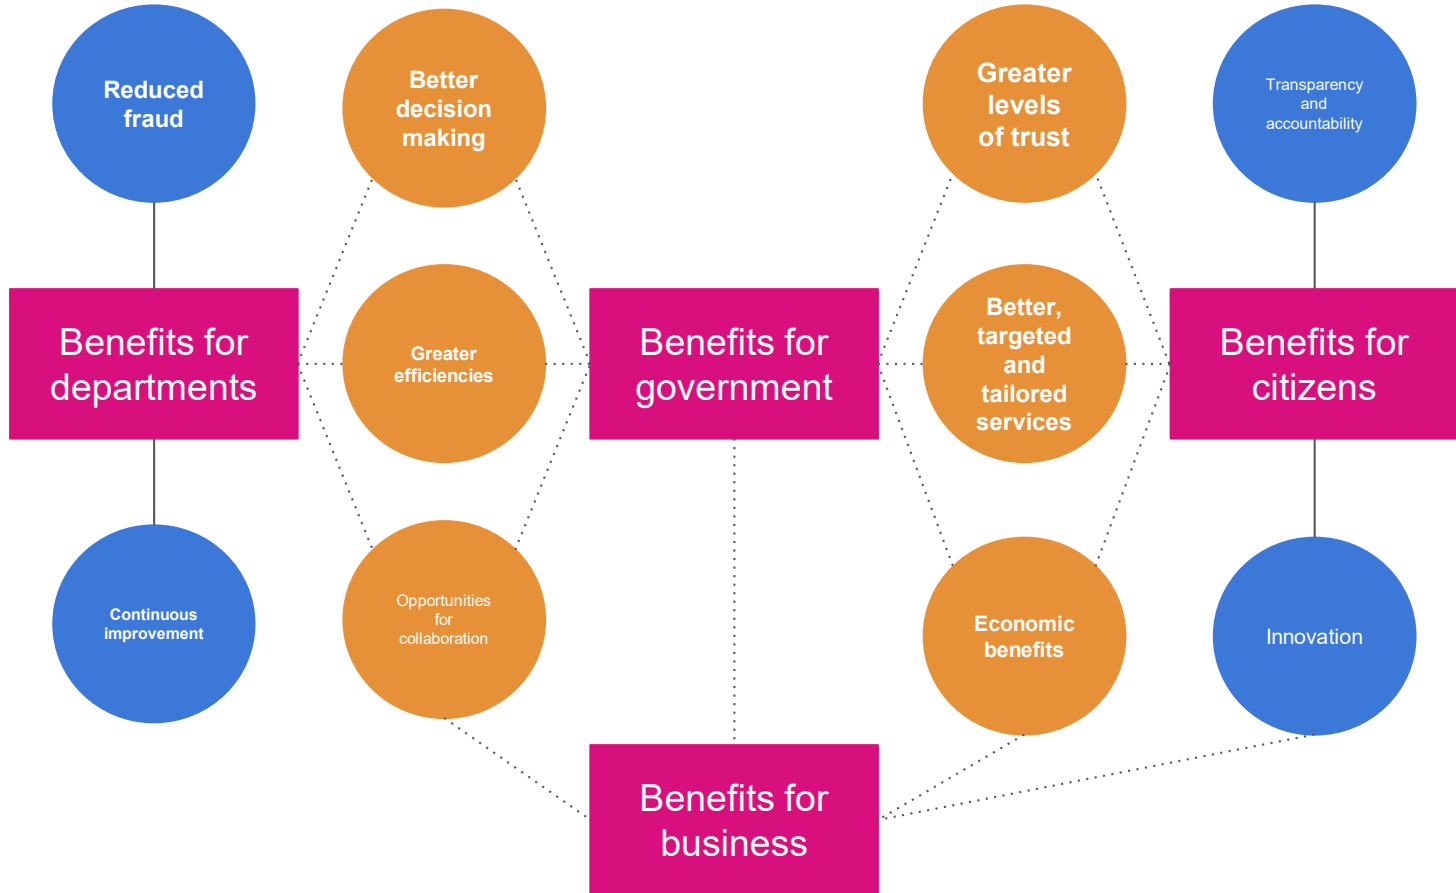

Sir Jeremy Heywood, Cabinet Secretary

‘We make better decisions when we’re better informed, and all data is, is information’

Mary Hamilton, Former Executive Editor Audience at the Guardian

If we get this right...

Context: we are not the only body shaping data policy

Public Authorities

Home Office and agencies

Dept of Health

HMRC

National Cyber Security Centre

GDS

DWP

Office of National Statistics

Business, Education, Innovation & Skills

Other key delivery depts

External Bodies

Wider Public Sector

ICO

Privacy and Consumer Advisory Group

Open Govt Partnership

National Data Guardian

Open Data Institute

A person is seen from the side, wearing a dark grey hoodie, looking at a laptop. The laptop screen is out of focus, showing some green and orange colors. The text 'The National Data Strategy' is overlaid in white, bold font on the left side of the image.

The National Data Strategy

The story so far

“The Prime Minister has also today asked the Digital Secretary Matt Hancock to produce a National Data Strategy to unlock the power of data in the UK economy and government, while building public confidence in its use.”

13 June 2018

First Principles

We want to deliver an ambitious strategy that positions the UK as a global leader on data

How?

Collaboration

- Working collaboratively across Government to develop the strategy
- Creating partnerships and collaborations with external stakeholders

Openness

- Working in the open, actively engaging with a range of diverse voices and communities
- Sharing thinking as it develops and seeking feedback regularly

Discussion

- Feedback on our approach to the National Data Strategy
- What's your wish for the National Data Strategy?
- **What should our remit be, beyond the walls of government?**
